Profile

A Computer Science graduate from Bina Nusantara University specializing in Android Application development. Skilled in Java, Kotlin, and PHP, with experience developing maintainable applications using MVVM architecture and RESTful APIs. A fast learner with strong adaptability to working environments, currently expanding expertise in Cyber Security and backend development with Spring Boot.

Education

- **Bina Nusantara University – Alam Sutera, Indonesia | September 2020 – April 2024**
  - Bachelor of Computer Science
  - GPA: 3.85/4.00

Work Experiences

Application Developer | June 2024 – May 2025
PT Hartono Istana Teknologi (Polytron)

- Developed and maintained web applications and RESTful APIs using PHP and Laravel
- Developed Android applications using Java with the MVVM architecture to improve code maintainability and scalability
- Integrated Bluetooth thermal printers into Android applications using the ESC/POS library to enable document printing

Mobile Programmer Intern | March 2023 – February 2024
PT Hartono Istana Teknologi (Polytron)

- Developed Android mobile applications using Java used by warehouse operators to support inventory management, including an RFID scanning application that transmitted data to a desktop application via Bluetooth
- Maintained and enhanced existing Android applications by applying the MVVM architecture to improve code maintainability
- Developed web applications and RESTful APIs using PHP and Laravel
- Developed a companion desktop application utilizing C# to receive and process data from Android device via Bluetooth
- Designed and developed interactive game using C# and the Unity game engine

Certificates

- **Belajar Dasar Pemrograman JavaScript**: Dicoding Indonesia | Jun 2025 – Jun 2028
- **Memulai Pemrograman dengan Python**: Dicoding Indonesia | Nov 2024 – Nov 2027
- **Belajar Dasar Structured Query Language (SQL)**: Dicoding Indonesia | Nov 2024 – Nov 2027
- **Belajar Dasar Data Science**: Dicoding Indonesia | Nov 2024 – Nov 2027
- **Belajar Prinsip Pemrograman SOLID**: Dicoding Indonesia | Okt 2023 – Okt 2026
- **Belajar Membuat Aplikasi Android untuk Pemula**: Dicoding Indonesia | Sep 2023 – Sep 2026
- **Memulai Pemrograman Dengan Kotlin**: Dicoding Indonesia | Sep 2023 – Sep 2026
- **Java (Basic) Certificate**: HackerRank
- **Belajar Membuat Aplikasi Flutter untuk Pemula**: Dicoding Indonesia | Juli 2022 - Juli 2025
- **Memulai Pemrograman Dengan Dart**: Dicoding Indonesia | Juli 2022 - Juli 2025
- **Cara Cepat Memahami Data Structure**: Course-Net Indonesia
- **Algorithm & Programming Coaching**: Course-Net Indonesia

Technical Skills

- **Programming Languages:** Java, Kotlin, PHP, JavaScript
- **Mobile Development:** Native Android (Java and Kotlin), Android SDK, MVVM Architecture, ESC/POS Thermal Printing, Bluetooth and RFID Integration, Flutter
- **Web and Back End Development:** Laravel, Spring Boot, RESTful APIs
- **Tools & Platforms:** Git, GitHub, Android Studio, Visual Studio Code, Visual Studio, Postman

Projects

Perbana (Peringatan Bencana)

- Developed a Native Android application using Java to provide real-time weather updates, disaster alerts, and earthquake warning notifications.
- Integrated external weather and seismic data services to deliver timely safety information to users.
- Repository: https://github.com/RandyNasuta/Perbana

EasyWakeUp

- Developed a modern Android application using Kotlin and Jetpack Compose featuring unique wake up challenges such as math problems, typing tests, and object recognition utilizing Google ML Kit Image Labeling to prevent oversleeping.
- Integrated on device machine learning capabilities for real time photo verification to ensure users are fully awake before dismissing alarms.
- Repository: https://github.com/RandyNasuta/Easy-Wake-Up

TokoPerabot

- Developed an Android application using the Flutter framework as the final capstone project for Dicoding's Multi-Platform App Development course.
- Designed a mobile furniture catalog interface to display available products, pricing, and detailed specifications.
- Repository: https://github.com/RandyNasuta/Tokoperabot

BersihLah

- Developed an Android based on-demand house cleaning platform using Java to connect busy homeowners with professional cleaning services.
- Implemented flexible service ordering workflows, ranging from single-room cleaning to comprehensive whole-house sanitation packages.
- Repository: https://github.com/RandyNasuta/BersihLah-App
